### **Cases Are High In Your Area**

We must all work together to get the local case rate down as national lockdown begins to lift. Protect yourself and others by following the rules, getting tested regularly and getting vaccinated if you're eligible.

### **The Coronavirus Vaccine Is Safe**

The coronavirus vaccine is safe and effective and is our best chance at returning to normality. If you are eligible, please take up your vaccine offer to protect yourself and your loved ones. The biggest risk is not having it.

[www.staffordshire.gov.uk/coronavirus](http://www.staffordshire.gov.uk/coronavirus)

The coronavirus vaccine has been tested and approved by regulators and is safe for you to have. The biggest risk is not having it, so please take up your offer of a vaccine when you receive it.

### **1 in 3 People with Symptoms**

People can have Covid but not show any symptoms. Protect yourself and others by getting tested regularly if you need to leave the house for essential reasons.

There are plenty of testing options including rapid testing and home testing kits.
